Runxin Manual Filter Valve

51110(F56D1)

Manual Filter Valve: 51110(N56D)

Manual filter valve 51110（F56D）

Technical Parameters：

●Water Pressure----------0.15—0.6MPa

●Water Temperature----------5℃-50℃

●Water Turbidity---------- < 20FTU

●Inlet/Outlet----------2″ Female

●Drain----------1.5″ Female

●Base----------4″-8UN

●Riser Pipe----------1.5"D-GB

●Max Flow Rate----------10 m3/h

●Suitable Tank Size (in)---------- 10″ ~ 24″

Product Characteristics：

■It adopts hermetic head faces with high degree pottery and corrosion resistance for opening and closing.

■No water passes the valve in rinse in single tank type.

■Reasonable design of the flow passage: Service→ Fast Rinse→ Backwash → Fast Rinse → Backwash →Service.

■It can be changed to be side-mounted valve with side-mounted connector.

■It can operate under pressure, without leakage.

Range of Application：

Residential filtration system

Swimming pool filtration equipment

Active carbon or sand filter in RO pretreatment filtration system
