

# Runxin Manual Softener Valve

61104(F64A)

4m<sup>3</sup> /h

Manual Softener Valve: 61104(F64A)

## Runxin Manual Softener Valve F64A

### Technical Parameters :

- Water Pressure-----0.15—0.6MPa
- Water Temperature-----5°C-50°C
- Water Turbidity-----Down-flow regeneration < 5FTU
- Inlet/Outlet-----1" Female
- Drain-----1/2" Male
- Brine Line Connector-----3/8" Male
- Base-----2.5"-8NPSM
- Riser Pipe-----1.05 "OD
- Max Flow Rate-----4 m3/h
- Suitable Tank Size (in)-----6" ~ 18"

### Product Characteristics :

- It adopts hermetic head faces with high degree pottery and corrosion resistance for opening and closing.
- No water pass the valve of single tank type in regeneration
- Various ways of installation: it can be top mounted or side mounted
- Handle alternatives: metal Handle or plastic handle

### Range of Application :

Residential softening system

Ion exchange equipment

Boiler softening water system

RO pretreatment softening system, etc
